Frank Sedgman Reserve

Play and recreation precedent images

Explore examples for the eight improvement areas shown below. The photographs illustrate possible activities, facilities and design treatments to help people share their preferences.

Images are illustrative only. Final designs will depend on community feedback, site conditions, technical investigations and available funding.

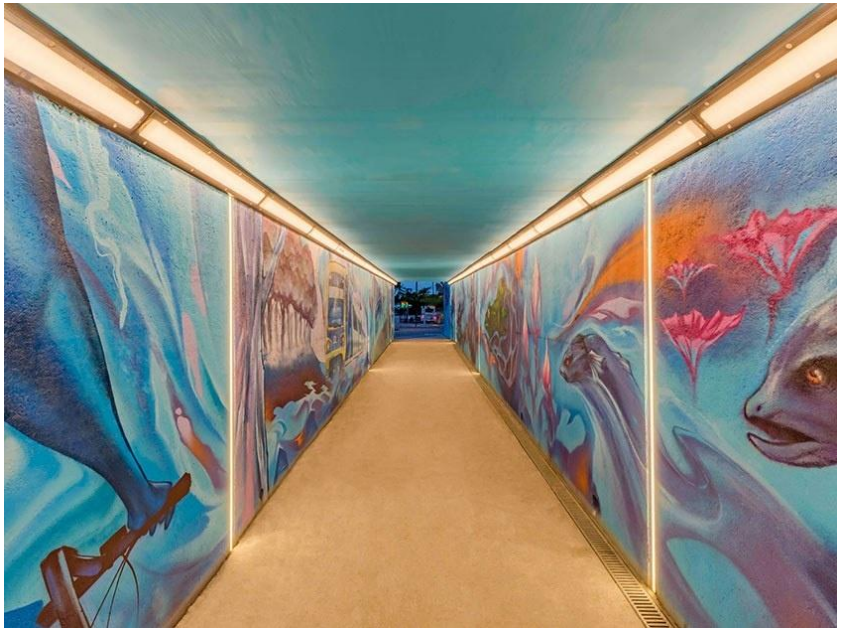

1. Underpass improvements

Artwork, lighting and clear views through an underpass can help create a more welcoming pedestrian connection.

A. Hampshire Road, Sunshine: artwork and lighting at the entrance.

B. Hampshire Road, Sunshine: illuminated artwork along the pedestrian passage.

Design ideas: coordinated lighting, colour and artwork; a clear walking route; and improved visibility at entrances.

2. Social recreation

Two different riding experiences illustrate options for informal recreation by bikes and scooters.

A. Scooter circuit at Bradbury Park, Brisbane: a concrete route with optional riding challenges.

B. Neighborhood pump track at Melaleuca Reserve, Mount Gambier: rollers and banked turns.

Scooter circuit: a riding loop with turns and small skill features. Recreational pump track: a rolling circuit where riders build momentum by shifting their body weight. Both can accommodate bikes and scooters, depending on the design.

3. BBQ and social spaces

Places where people can come together to meet, eat, relax and socialise, supported by picnic settings, shelter and landscaping.

A. Tormore Reserve, Boronia: shelter and picnic settings alongside recreation facilities.

B. Tormore Reserve, Boronia: multiple tables within an open park setting.

Design ideas: accessible picnic settings, shade or shelter, nearby BBQ facilities and space for more than one group. These photographs illustrate the seating and shelter component.

4. Seating

A mix of comfortable resting seats and seating arranged for conversation can support different ways of enjoying the reserve.

A. Gwynne Street Pocket Plaza, Cremorne: curved seating and small tables for social use.

B. Gwynne Street Pocket Plaza, Cremorne: a seat with back and armrests.

Design ideas: seats with backs and armrests, shaded resting points and creative seating reflecting local character.

5. Tennis court upgrades

Hard-surface tennis courts and a hit-up wall illustrate opportunities for broader community use and casual practice.

A. Roseville Park, New South Wales: acrylic hardcourt and perimeter fencing. [06]

B. Roseville Park: a separate hit-up wall and practice area. [06]

Design ideas: acrylic resurfacing, lighting, public access arrangements and a hit-up wall. The photographs illustrate the court surface and practice facilities; final access arrangements would be determined separately.

6. Pickleball court

A dedicated court provides a clearly defined space for informal pickleball games and social recreation.

Joachim Street Park, Holland Park West, Queensland: public pickleball courts in use.

Design ideas: court surfacing, clear line markings, a net, ball containment and convenient access.

7. Future creek crossing

A pedestrian bridge and connecting paths could improve access to the reserve and surrounding walking network.

Gembrook Park, Victoria: a pedestrian bridge and boardwalk integrated into a natural landscape. [08]

Design idea: a convenient walking connection across the creek. The image illustrates the type of connection; the location, structure and approvals would require further investigation.

8. Play space renewal

Equipment-only illustrations show climbing, swinging and sliding opportunities. These are visual cues for consultation; final equipment and suppliers would be selected through design.

A. Climbing unit: a rope climbing structure with an integrated climbing panel. [09]

Source 09 Whitehorse City Council and KOMPAN

B. Swings: a timber swing frame illustrating different swing seat options. [09]

Source 09 Whitehorse City Council and KOMPAN

C. Slide: a standalone slide with steps and handholds, KOMPAN M351. [10]

Source 10 KOMPAN

Survey choices: climbing unit; junior and adult swings; slide. Swing seat types and suitability for different users would be confirmed during design.

Play space renewal continued

Equipment-only illustrations show seesaw, rocking and gliding opportunities. These examples complement the climbing, swinging and sliding choices.

D. Seesaw: a traditional two-person balance and rocking activity. [09]

Source 09 Whitehorse City Council and KOMPAN

E. Spring rocker: a horse-shaped standalone rocking item. [09]

Source 09 Whitehorse City Council and KOMPAN

F. Track ride: a platform and overhead gliding rail. [09]

Source 09 Whitehorse City Council and KOMPAN

Survey choices: seesaw; spring rocker; track ride. The track ride is a short overhead gliding activity, distinct from the scooter circuit or pump track in Area 2.
